

Fleet Management Area

Welcome to the finding out more guide to our website Fleet Management Area. This guide will show you what is available for a fleet manager.

The system is divided into 2 main areas the first allowing a fleet manager access to all manner of fleet and driver details and the second allows a supplying dealer to update outstanding order information.

Fleet Manager Logon

If you are a fleet manager and you logon to this secure area you will be presented with a summary screen giving you quick access to key details such as total vehicles on fleet/order and total vehicles due a service. There are further reports available such as MOT reports and mileage status reports as well as a carbon footprint report.

As a fleet manager you can see detailed views of your outstanding orders with JCT600 Contracts. You will be able to see order status updates as well as key information like your reference number, driver name and delivery address. You can see if an estimated delivery date has moved backwards or forwards and keep a track of any confirmed orders still to be delivered.

A fleet manager can also see details of their current fleet with JCT600 Contracts. A fleet manager has access to just about everything they could ever want to know about their fleet. Details such as driver name, contract mileage, current estimated mileage, estimated end of contract mileage, p11d value, rental cost, effective cost, co2 emissions are all available. As with all the reports in our system this fleet list can be downloaded into Microsoft Excel at the touch of a button allowing you to play about with the figure to your hearts content.

Reporting is available for a fleet manager for mileage status reviews. Service due and overdue reports as well as MOT due and overdue reports are also available.

There is a carbon footprint report available and also a technical detail report showing you many of the technical details of your fleet like chassis numbers and fuel mpg's.

Fleet managers can access and inform JCT600 Contracts online about their renewal requirement using our colour coded traffic light system i.e. green contracts that are just entering their renewal period, amber contracts that are due for renewal within a month and red contracts that are now due for renewal. The system allows the user to select pre-set responses for each contract to inform us of their requirements.

Finally a fleet manger can manage their returned vehicles that require attention under our "fair wear and tear" policy. Copies of garage estimates as well as digital photographs are all available online for the fleet manager to see and either authorise or dispute.

Further links to accident management, driver licence checking and contract hire quotation portals are also accessible for users that have chosen to take advantage of these services.

Supplying Dealer Logon

JCT600 Contracts now offers its supplying dealers the ability to update orders daily on our system thus keeping the fleet managers orders details bang up to date.

As a supplying dealer you can logon and update the estimated date in stock for any orders JCT600 Contracts has outstanding with you.

This data is taken daily into our back office and published back up to the web. Your logon allows you to enter the new date in stock as well as see your previous entry.

More Details Required?

If you have a need for further details on the Fleet Manager logon please contact your account manager or you can contact our sales team on sales@jct600.co.uk or by telephone on 0113 2500060.

If you have a need for further details on the Supplying Dealer logon please contact Lindsay Francis on lindsay.francis@jct600.co.uk or telephone 0113 2500060.

Thank you.

JCT600 Contracts Limited.
